

## Technical data sheet BAG® round formworks diameter 650 mm to 1200 mm

Material:	Sheets out of high impact polystyrene, surrounded by several layers of a special glass fiber tape.
Production diameters:	650 mm up to 1200 mm.
Production length:	up to 20 m.
Wall thickness:	2,5 mm up to 3,0 mm.
Types:	Smooth/ Structured finish.
Smooth:	At least 2 small joints will be visible in the length of the tube caused by the joining of the HIPS sheets.
Structure:	Structured concrete surface with our special types of structure foils.
Exposed concrete classification:	With smooth finish SB4. Test concreting necessary.
Opening system:	The formworks will be opened by cutting with a knife from the top to the bottom.
Disposal:	Due to the material composition, the formwork casing can be disposed of thermally without any problems.
Transport security:	Formworks beginning with a diameter of 650 mm get at least 2 EPS transport securities which are sticking inside the tube.
