

## Technical data sheet Round Formworks up to diameter 600 mm

Material:	Multilayered welded layers of a special paper.
Production diameters:	150 mm up to 600 mm.
Production length:	up to 20 m.
Wall thickness:	2,5 mm up to 3,00 mm.
Types:	Spiral/ Smooth/ Structured Finish.
Spiral finish:	A spiraled mark will be visible on the concrete Surface.
Smooth finish:	Smooth, closed concrete surface because of the liner, the connection of the line will be slightly visible on the concrete surface, very slight shrinking.
Structured finish:	Wood-structure, Stone-structure and Special-structures possible.
Exposed Concrete classification:	With smooth finish SB4. Test concreting necessary.
Opening system:	With the help of the inserted wire easy and force saving opening of the form work.
Disposal:	Due to the composition of the material, the casing can be disposed of thermally without any problems.
